

AAE2004 Introduction to Aviation Systems

AAE

Design of Path Planning Algorithm for Aircraft Operation

Week 8: Discussion and Outlook

Dr Li-Ta Hsu

Assisted by

Dr Weisong Wen, Mr Feng Huang, Ms Bo Zhang

Why coding/programing is important for Aviation Engineering (specially after COVID-19)?

What are challenges to make this happen?

Infrastructure inspection

- Parcel Delivery

Infrastructure inspection

- building and bridge defects, etc.

Search and Rescue (SAR)

- disaster prevention and rescue,

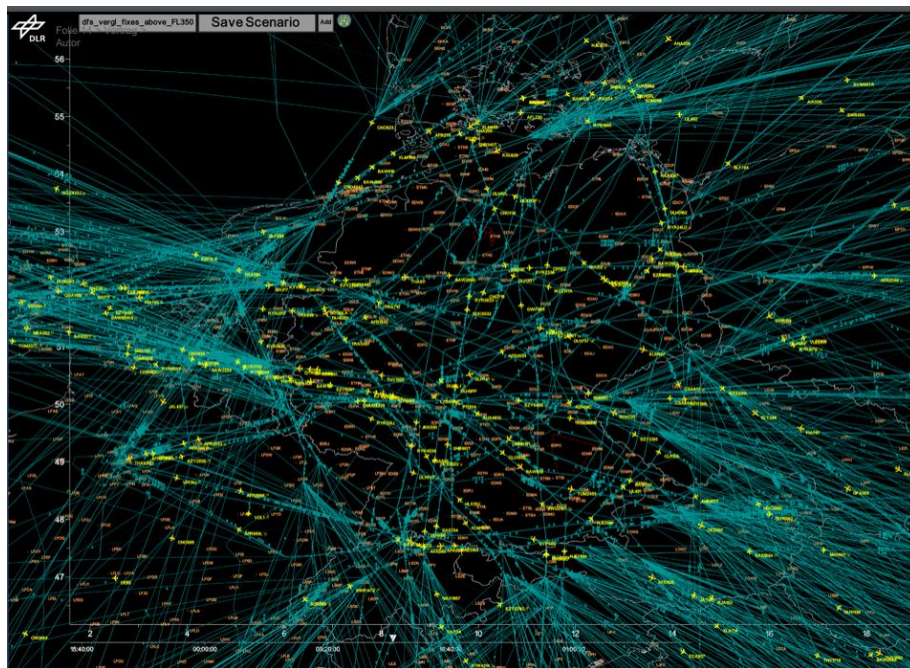

Smart transportation

- traffic monitoring management
- air quality monitoring

Crowded Airspace in Cities

Challenges - Collaborative Path Planning

<https://www.youtube.com/watch?v=7Kla9FlmbRc>

Keywords: Path planning, traffic control, SWARM collabation, IoT, Connect vehicles, and Smart Cities

A Boeing 747 aircraft is shown in flight, banking upwards and to the right. The aircraft is white with blue accents, including the Boeing logo on the nose and the number '747' on the tail. It is flying above a thick layer of white clouds against a clear blue sky. On the right side of the image, there is a vertical strip of colorful, abstract patterns, possibly representing a data visualization or a decorative element.

Keywords: Perception by AI (deep learning), image processing, estimation and optimization

Challenges – Navigation in Challenged Environments

Challenge in GNSS Positioning

Visual Navigation

<https://www.polyu.edu.hk/researchgrp/cywen/index.php/en/mav-uav/perception-slam.html>

Time of Flight Visual Inertial Odometry (ToF-VIO)

Keywords: GNSS, inertial navigation system, visual positioning, simultaneous localization and mapping (SLAM), sensor fusion, filtering.

Integrity and Safety

Keywords:

Airworthiness, Reliability, Compliance (regulation-wise)

Statistics and modelling (mathematics-wise)

Most of the sample open-source codes can be found in GitHub

AtsushiSakai/PythonRobotics: Python sample codes ... - GitHub

This is a **Python code** collection of robotics algorithms, especially for autonomous navigation. Features: Easy to read for understanding each **algorithm's** basic idea.

mnielsen/neural-networks-and-deep-learning: Code ... - GitHub

GitHub is home to over 50 million developers working together to host and review **code**, manage projects, and build **software** together. Sign up. master.

To do list in your 4 years...

1. To initiate one hand-on project (by coding or manufacturing) related to your passion.
 - Manufacturing an UAV, Enabling autonomous function of an UAV, etc
2. To find news and articles (by hashtag or club in social networks) that related to your interests.
 - Accumulating your domain knowledge and expand your network with someone who have similar passion to you.
3. To find the issues/problems (in your network, village, city, nation, area and the world) you cared and try to find solutions to these challenges.

Dialogues and Discussions

Dare to ask and communication is the first step of your
success

In this project, we do...

Aircraft Model	C_F	ΔF	C_T	ΔT	C_c	ΔF_a	ΔT_a	C_P	ΔP
PolyU-A380	1	1	2	5	10	0.2	0.2	-2	2

$$C = C_F \cdot \Delta F + C_T \cdot \Delta T + C_c + C_P \cdot \Delta P$$

But in the real life,

Aircraft Model	C_F	ΔF	C_T	ΔT	C_c	ΔF_a	ΔT_a	C_P	ΔP	...
Your designed aircraft	?	?	?	?	?	?	?	?	?	?

What does C_p mean? Jet Stream Winds

<https://www.youtube.com/watch?v=tMN1f4dvpHI>

To do list in this project...

1. Finish as much tasks (using Python) as you can
2. Write a report to introduce your project and reflect what you have learned
3. Make a video presentation to share and communication your ideas and projects
4. Submit the peer evaluation form individually
