# Additional Tasks

---

# Additional Tasks

- Start working on the following Tasks after you finish the previous ones (Create separate .py files so these tasks don't affect each other)
- Additional Tasks:
  - Adding Checkpoints
  - Changing Environment
  - Compare Different Algorithms

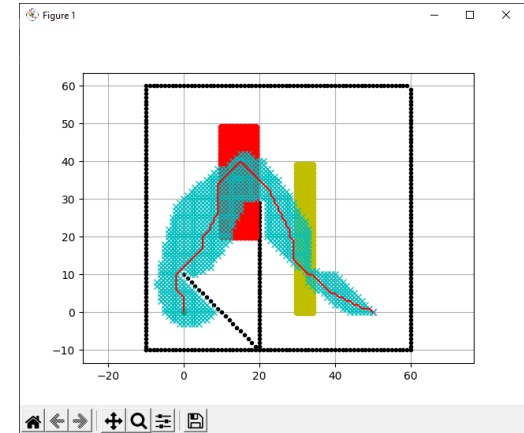

# Adding a Checkpoint (Waypoint)

- Assume the Aircraft is a supply craft that must reach 2 drop-off points to drop supplies before heading back to base
1. Add 2 checkpoints:
    - One per each heavy consumption area
  2. Reach all checkpoints before arriving at the destination

# Adding a Checkpoint

- Requirements:
  1. This is an add-on for the code you are currently working on
  2. Checkpoints should be generated inside the heavy consumption areas
  3. Print the checkpoints, planning and the final path correctly **with different appearance**

# Changing Environment

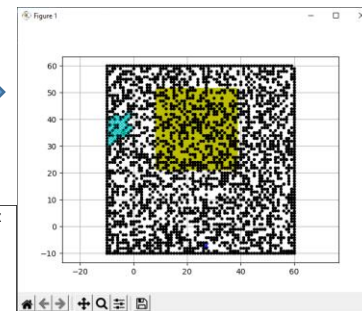

- **Start this using the code from the first 3 tasks (No checkpoints needed)**
- We have been working on the same set of obstacles
- However, Path Planning should be able to work with different obstacle sets
- **A new scenario** per execution

# Changing Environment

- Modify the code so that:

1. Only the fuel-consuming area remains and generate it randomly **with a fixed area (30x30)**
2. Diagonal movement is **disabled**, change parameter(s) so that the object could travel **within one grid size**
3. Obstacles are generated randomly with **reasonable density**
4. Destination and starting points are generated randomly with **at least a 50-unit distance in-between**
5. Diagonal movements are **disabled**
6. Plotting of the fuel-consuming area would not cover the obstacles, and obstacles **should not generate** at/near the start and end point

Density too high

Reasonable

Density too low

# Comparing Algorithms

1. Choose 2 more algorithms from this GitHub repository (<https://github.com/AtsushiSakai/PythonRobotics/tree/master/PathPlanning>)
2. Modify the code so all 3 algorithms are working with the **same obstacle set**
3. Try and compare the algorithms and produce a conclusion
