

ENG1003 Freshman Seminar for Engineering AAE Design of Path Planning Algorithm for Aircraft Operation

Week 6: Project Goals (design & learning)

Dr Li-Ta Hsu

Assisted by

Dr Weisong Wen, Mr Feng Huang, Ms Bo Zhang

Additional Tasks

Additional Tasks

- Start working on the following Tasks after you finish the previous ones (Create separate .py files so these tasks don't affect each other)
- Additional Tasks:
 - Adding Checkpoints
 - Changing Environment
 - Compare Different Algorithms

Adding a Checkpoint (Waypoint)

- Assume the Aircraft is a supply craft that must reach 2 drop-off points to drop supplies before heading back to base
- 1. Add 2 checkpoints:
 - One per each heavy consumption area
- 2. Reach all checkpoints before arriving at the destination

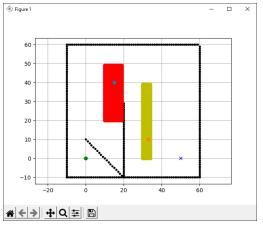

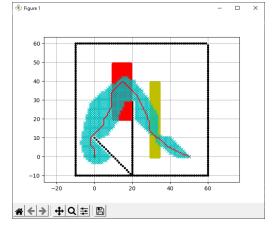

Adding a Checkpoint

- Requirements:
 - 1. This is an add-on for the code you are currently working on
 - 2. Checkpoints should be generated inside the heavy consumption areas
 - 3. Print the checkpoints, planning and the final path correctly with different appearance

Changing Environment

- Start this using the code from the first 3 tasks (No checkpoints needed)
- We have been working on the same set of obstacles
- However, Path Planning should be able to work with different obstacle sets
- A new scenario per execution

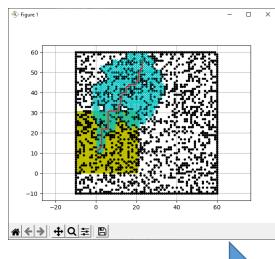

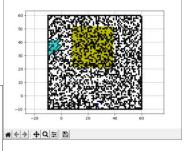

Changing Environment

- Modify the code so that:
 - Only the fuel-consuming area remains and generate it randomly with a fixed area (30x30)
 - 2. Diagonal movement is **disabled**, change parameter(s) so that the object could travel **within one grid size**
 - 3. Obstacles are generated randomly with reasonable density
 - 4. Destination and starting points are generated randomly with at least a 50-unit distance in-between
 - 5. Diagonal movements are **disabled**
 - 6. Plotting of the fuel-consuming area would not cover the obstacles, and obstacles **should not generate** at/near the start and end point

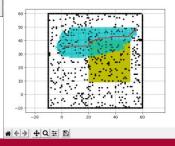

Density too high

Density too low

Reasonable

Comparing Algorithms

- AStar is only one of the many Pathplanning Algorithms
- Different Algorithms
 - Different theories
 - Different performance
 - Difference limitations and strengths

-	AStar	fix unittest animation bugs (#429)	10 months ago
	BSplinePath	mypy fix test	2 years ago
	BatchInformedRRTStar	fix scanning error (#339)	15 months ago
	BezlerPath	Replaced sqrt(x**2+y**2) with hypot in PathPlanning/BezierPath/bezier	2 years ago
	BidirectionalAStar	fix scanning error (#339)	15 months ago
	BidirectionalBreadthFirstSearch	fix scanning error (#339)	15 months ago
	BreadthFirstSearch	Update breadth_first_search.py (#374)	13 months ago
•	BugPlanning	fix docstring error	12 months ago
•	ClosedLoopRRTStar	Fix No module error in GridBasedSweepCPP and ClosedLoopRRTStart (#516)	3 months ago
•	CubicSpline	improve test coverage (#352)	14 months ago
•	DStar	change DStar animation	4 months ago
•	DStarLite	Add D* Lite. (#511)	3 months ago
•	DepthFirstSearch	Update breadth_first_search.py (#374)	13 months ago
•	Dijkstra	Update breadth_first_search.py (#374)	13 months ago
•	DubinsPath	fix dubins path length bug and clean up codes. (#527)	2 months ago
•	DynamicWindowApproach	dwa pr (#390)	12 months ago
•	Eta3SplinePath	use pytest for test runner (#452)	8 months ago
•	Eta3SplineTrajectory	use pytest for test runner (#452)	8 months ago
•	FlowField	fix unittest animation bugs (#429)	10 months ago
•	FrenetOptimalTrajectory	mypy fix test	2 years ago
•	GreedyBestFirstSearch	Update greedy_best_first_search - calc_final_path method (#477)	7 months ago
•	GridBasedSweepCPP	Fix No module error in GridBasedSweepCPP and ClosedLoopRRTStart (#516)	3 months ago
•	HybridAStar	Test code clean up (#456)	8 months ago
•	InformedRRTStar	Using scipy.spatial.rotation matrix (#335)	15 months ago
•	LQRPlanner	add comment for stopping the simulation	2 years ago
•	LQRRRTStar	add comment for stopping the simulation	2 years ago
•	ModelPredictiveTrajectoryGenerator	Merge pull request #222 from zhkmxx9302013/master	2 years ago
•	PotentialFieldPlanning	Potential field - potential range and ociliations (#345)	14 months ago
•	ProbabilisticRoadMap	use scipy kd-tree directly (#337)	15 months ago
•	QuinticPolynomialsPlanner	Using scipy.spatial.rotation matrix (#335)	15 months ago
•	RRT	Sobol sampler implemented (#413)	8 months ago
•	RRTDubins	fix dubins path length bug and clean up codes. (#527)	2 months ago
•	RRTStar	Bug RRT+ fix, issues #382 and #383 (#401)	11 months ago
•	RRTStarDubins	fix dubins path length bug and clean up codes. (#527)	2 months ago
•	RRTStarReedsShepp	add comment for stopping the simulation	2 years ago
•	ReedsSheppPath	Fix reeds shepp path issue (#529)	2 months ago
•	SpiralSpanningTreeCPP	fix deprecation warning for latest numpy (#480)	7 months ago
•	StateLatticePlanner	fix state_lattice_planner.py coordinate conversion (#495)	5 months ago
•	VisibilityRoadMap	fixed CI	2 years ago
•	VoronolRoadMap	fix dijkstra hypot check bug (#522)	2 months ago
	WavefrontCPP	fix deprecation warning for latest numpy (#480)	7 months ago

Comparing Algorithms

- Choose 2 more algorithms from this GitHub repository (https://github.com/AtsushiSakai/P ythonRobotics/tree/master/PathPl anning)
- 2. Modify the code so all 3 algorithms are working with the same obstacle set
- 3. Try and compare the algorithms and produce a conclusion
